2018

WHY PURIFY?

In today's day and age, it's vital to make sure that the water you drink is of the highest quality. When we say 'highest quality', we mean that your water should be free of suspended solids like sediment, sand, rust, bio-debris, mould and yeasts; free of chemicals like chlorine, hydrogen sulphide and pesticides; free of disinfectant by-products including trihalomethanes; free of microplastics; free of heavy metals like lead, mercury, arsenic and cadmium and free of biological activity including bacteria, cysts, viruses and pathogens. Is the water that runs freely from your tap free of the above-mentioned contaminants?

Our bodies are made up of about 75% water and all bodily functions and organs depend on quality water and good hydration to function optimally. Good hydration does not only mean to keep drinking the right amount of water, it means to drink the highest quality, purified water on the market. Being well-hydrated not only boosts energy levels; it assists in weight-loss, flushes out toxins, aids digestion, and promotes a general state of wellbeing. Consider the quality of the tap water at home and make the right decision for you and your family.

COUNTERTOP WATER PURIFIERS

Purified water should be a standard in all kitchens and it should be within immediate access to everyone. Our countertop water purifiers offer high-capacity solutions that can be easily connected to existing taps to provide your entire family with water that not only looks and tastes great, but is good for their health too.

A number of our countertop water purifiers are fully portable. This means that should you be heading off to enjoy a family vacation, you can take your purifier with you and enjoy great-tasting purified water wherever the road takes you.

CTP

- Connects easily to existing taps and sits on countertop
- Fully portable
- Includes lead-free faucet diverter
- Improves taste and colour and eliminates odours
- Expected maximum capacity: 37 000 l
- GAC/KDF®/Riolyte® sealed cartridge unit
- Sediment pre-filter sold separately

- Connects easily to existing taps and sits on countertop
- Stylish black and chrome finish
- Includes lead-free faucet diverter
- Improves taste and colour and eliminates odours
- Expected maximum capacity: 18 925 l
- GAC/KDF®/Riolyte® sealed cartridge unit
- Sediment pre-filter sold separately

UNDER-COUNTER WATER PURIFIERS

Purified water should be compulsory in every household and no kitchen should function without a water purification system. Our under-counter water purifiers are discreetly installed under your sink, fitted inline under the kitchen preparation bowl sink or to a separate dedicated purified water faucet. The US4 under-counter water purifiers can also be T'd off to supply purified water not only to your preparation bowl faucet, but also to the fridge and other appliances, for example an ice machine or water cooler. Unlike Reverse Osmosis water purifiers, these popular water purifiers do not waste a single drop of water in the treatment process and are surprisingly compact, taking up minimal space under the sink.

Our unique GAC/KDF®/Riolyte® media bed treats up to 132 000 litres of water and removes a wide variety of chemicals and contaminants that are commonly found in the tap water, including chlorine, disinfectant by-products, heavy metals, pesticides, sediment and bio-debris. When purifying with our unique water purification systems, you're left with clean, healthy, great-tasting water.

- Self-contained gourmet cube ice maker
- Ideal for small volume ice needs
- Daily output: 20kg
- Storage capacity: 10kg
- Gourmet cube: 20g
- Connects to water supply and drain
- Front air intake and exhaust facilitate installation under-counter or as a built-in unit
- Purification system is not included

EC 46 SCOTSMAN

- Self-contained gourmet cube ice maker
- Ideal for small volume ice needs
- Daily output: 24kg
- Storage capacity: 9kg
- Connects to water supply and drain (progressive water discharge)
- Quiet by nature
- Purification system is not included

If you enjoy the luxury of ice on demand, an ice machine is the epitome of convenience. You'll never run out of ice when you need it most and you'll never have to dispose of plastic ice bags or hassle with ice trays again.

Connected to an H2O International purifier, you'll enjoy refreshing, great tasting purified ice whenever you want.

BOTTLELESS WATER DISPENSER

Hydration is essential at the office and at home, because drinking the right amount of purified water keeps you healthy and productive.

Directly connected to your main water supply, the bottleless dispenser is a convenient solution for both environments. No bottles and no hassle. The hermetically sealed compressor runs silently, which is ideal for the office and home environment. It's quick and easy to clean and requires minimal maintenance.

Connected to an H2O International purifier, you can enjoy healthy, great-tasting hot and cold water on tap.

SAECO LIRIKA OTC

- "One Touch" cappuccino and latte option
- Automatic cleaning and de-scaling, removable water tank, drip tray, dreg draw and brew unit
- Ceramic grinder blades
- Adjustable coffee dispenser
- Adjustable aroma with 3 strength settings

There's no better way to start the day than with a delicious cup of coffee. Our range of coffee machines will ensure that you get your caffeine fix for the day with the touch of a button.

Here's an interesting fact: great coffee starts with high-quality water; so for the best cup of coffee, be sure to fill your coffee machine using water that's passed through an H2O International water purifier.

WINE COOLERS

Our wine coolers solve the issue of wine bottles not fitting between the milk, eggs, and half-empty tomato sauce bottles in the fridge by being a dedicated space for wine connoisseurs to store their prized possessions at optimal temperatures. We offer wine coolers that cater for those looking to store as few as 10 bottles of wine to those who require room for over 100.

Having a space dedicated for your collection will help you keep things organised and allow you to be prepared for every occasion that requires a chilled glass of wine.

TFW 80S TEFCOLD

FOOD WASTE DISPOSERS

Food waste disposers help recycle kitchen waste. Our quality, continuous feed food waste disposers are able to handle large quantities of waste produced in a domestic kitchen.

It's the most convenient way to dispose of food waste in the kitchen. Not only are these products super convenient, but they are hygienic too. Nearly 20 per cent of residential waste is classified as food waste, so why not eliminate it from our landfills completely and contribute to making the world a greener place?

Streamline your kitchen with these nifty and eco-friendly appliances.

WHOLE HOUSE PURIFIERS

Whole house purifiers do not only purify your municipal tap water for your entire home, but it can also purify borehole and rain water. Speak to your H₂O International consultant for a solution that will suit your needs.

Recent reports say that chemicals and contaminants in South Africa's municipal tap water are on the increase, putting you and your family's health at risk. Luckily, we have systems designed to capture and remove chlorine, dangerous chemicals and contaminants before they do damage.

Our whole house water purifiers treat your municipal water as it enters your home. Every drop is 100% purified, aimed at protecting the health of you and your family. Enjoy healthy, great-tasting purified water from every tap in your home whether you're drinking, cooking, brushing teeth, making coffee or showering.

We know that every home has different water purification requirements, so get in touch with your local H₂O International store. We are capable of designing a tailor-made whole house purification solution that will suit your needs.

HOW OUR POPULAR WATER PURIFIERS WORK

DO NOT PRINT

Send a request to Brainstorm.

- 1) **5-Micron filter pad** – Blocks organic and inorganic suspended solids, like sand and bio-debris.
- 2) **KDF®** – Removes iron, aluminium and heavy metals like lead, arsenic, cadmium and mercury.
- 3) **5-Micron filter pad** – Blocks rust, clay, algae, etc.
- 4) **Granular Activated Carbon (GAC)** – Effectively removes chlorine, highly carcinogenic by-products, pharmaceutical waste, pesticides and hundreds of other chemical and organic contaminants.
- 5) **Riolyte®** – Beneficial minerals that make the water slightly more alkaline and very palatable.
- 6) **Silver impregnated GAC** – Anti-bacterial silver protects against biological activity from backward contamination.
- 7) **5-Micron filter pad** – Blocks silt, sediment, etc.
