

GET THE MOST ADVANCED  
TECHNOLOGY IN  
WATER PURIFICATION  
IN SOUTHERN AFRICA

EXPERIENCE THE UNIQUE  
**GAC / KDF85® / RIOLYTE®**  
PROCESS MEDIA

EXCLUSIVE TO H2O | BWT INTERNATIONAL  
SA'S PREMIER WATER PURIFIER RANGE

**METALS OUT!  
CHEMICALS OUT!**

**MINERALS IN  
PH BALANCED**

**5-MICRON FILTER PAD**

Blocks silt, sediment, etc.

**RIOLYTE®**

Riolyte balances the pH and  
remineralises the water.

**5-MICRON FILTER PAD**

Blocks rust, clay, algae, etc.

**5-MICRON FILTER PAD**

Blocks organic and inorganic  
suspended solids like sand and  
bio-debris.

**SILVER IMPREGNATED GAC**

Silver inhibits the chance  
of backward contamination  
into the cartridge.

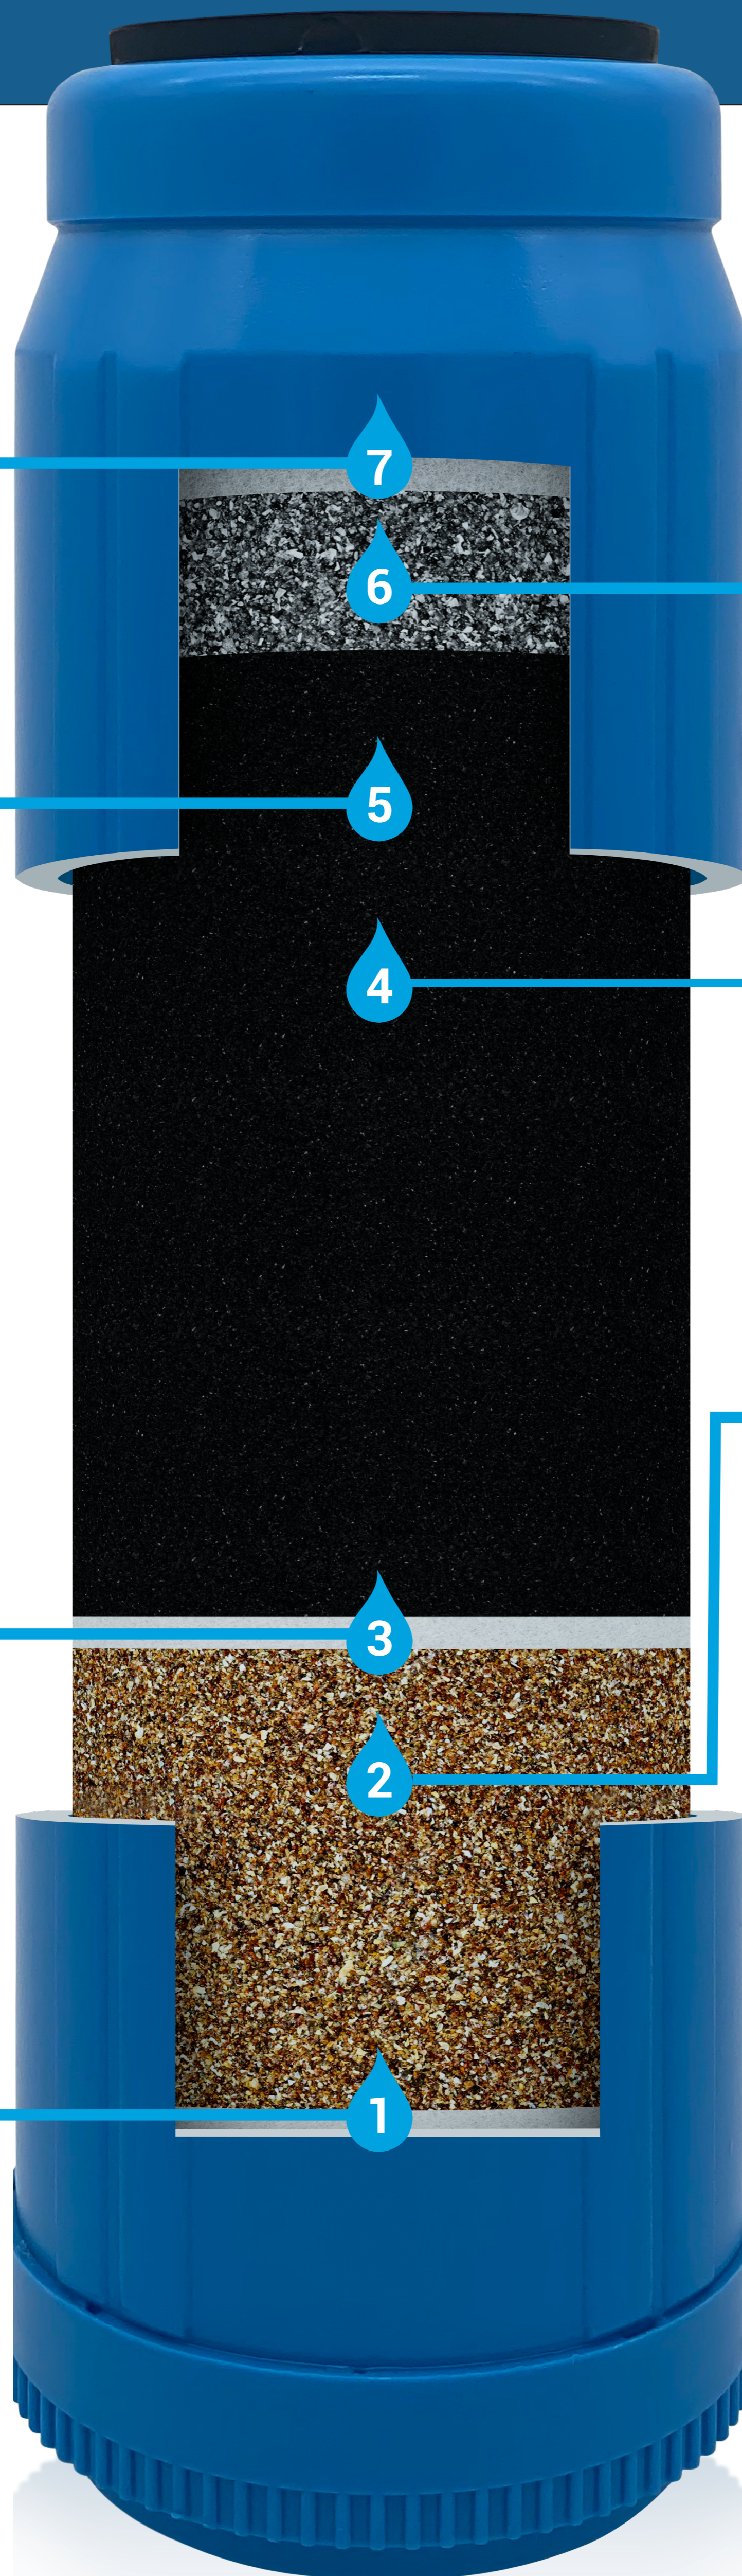

**GRANULAR ACTIVATED  
CARBON**

Carbon is extremely effective for  
the final extra polishing and  
removal of harmful,  
carcinogenic chemicals and  
adds a sweeter taste to the  
water.

**KDF85®**

Removes 99.9% of heavy  
metals like cadmium, arsenic,  
lead and mercury, as well as  
aluminium and iron. Chemicals  
like chlorine, hydrogen  
sulphide, chloramine,  
ammonia, pesticides, sodium  
hydroxide (bleach) and  
herbicides are removed.

KDF also emits an  
electromagnetic field that  
inhibits the chance of bacteria  
growth within the cartridge.
